

# MORPHOCLOUD

THE MULTI-BIOMETRIC PLATFORM FOR ALL BIOMETRICS

**SECURE • FUTURE-PROOF**  
**COST-EFFECTIVE • VERSATILE**

MorphoCloud is a secure and flexible cloud platform that supports Morpho products and solutions, starting with MorphoBIS, our flagship biometric solution for criminal justice and public security. The cloud platform provides mission critical multi-biometric identification services scaled to address the operational needs of law enforcement agencies.

# MORPHOCLOUD

THE MULTI-BIOMETRIC PLATFORM FOR *ALL* BIOMETRICS

## A SECURE INFRASTRUCTURE

MorphoCloud is hosted on the Microsoft® Azure Government platform, and complies with the most stringent security standards, including the ones issued by the FBI Criminal Justice Information Services (CJIS).

All data is encrypted in motion and at rest, hosted in the U.S. and operated by professionals with the appropriate level of clearance.

Redundant storage in data centers at least 800 miles apart ensures disaster-proof services delivered continuously.

## A VERSATILE MULTI-BIOMETRIC PLATFORM

Morpho brings multi-biometric identification services for friction ridge, face, and iris recognition to the cloud. In addition, our multi-biometric solution offers tattoo recognition, and voice recognition, as well as MorphoCloud-supported services, such as video analytics as-a-service, disaster recovery as-a-service, and, when approved by the appropriate authorities, Rap Back as-a-service.

## EVERGREEN & FUTURE-PROOF OFFER

MorphoCloud is an evergreen platform. MorphoCloud software is refreshed regularly, providing customers the latest technology and greatest advancements as soon as they are released to the market. No need to budget for a major software update every 5 to 10 years, they will come to you as soon as they are available as part of your contract!

## FLEXIBLE TO ADAPT TO NEEDS YOU DON'T EVEN KNOW ABOUT YET

MorphoCloud offers several configuration options to address different needs. Choose a full cloud solution, a disaster recovery system in the cloud, or a tailored solution to keep your data intact, safe, and accessible only to authorized users.

MorphoCloud scales up operations almost instantly, when an unforeseen event requires an increase in the number of users, throughput, or capacity. Flexible capacity is yours on demand, without having to plan for hardware acquisition or licensing.

## COST-EFFECTIVE

MorphoCloud is the most effective way to manage your agency's biometric identification solution. With vendor-owned and managed servers, your staff will be free to focus on mission-critical responsibilities.

Leveraging the cloud's vast scale, you have access to virtually unlimited memory and CPU resources without the extra cost. You can expand your system as your data and throughput expand, without the burden or expense of provisioning for and replacing hardware.

Law enforcement agencies have limited time and resources. MorphoCloud makes biometric processing fast and efficient.

MorphoCloud provides dramatic efficiency and cost improvements to law enforcement agencies. It can easily grow to meet customer demands, help police agencies solve more crimes, and provide cost-effective disaster recovery capabilities.

## FOCUS ON YOUR KEY MISSIONS

KEY MISSIONS, KEY TECHNOLOGIES, KEY TALENTS
